

Research Proposal: NACCER/2023/RD/8968

Novel Air Classification Approach for Efficiency Improvement of High-Ash Coal

Principal Investigator:	Prof. Suresh Mehta
Institution:	CSIR-CMRI
Research Area:	Mine Reclamation
Funding Source:	CIL
Duration:	12 months
Submission Date:	2023-08-06

Abstract

The research proposes an advanced solution to novel air classification approach for efficiency improvement of high-ash coal. The methodology involves through integration of IoT technologies and data analytics for comprehensive analysis and implementation. This will significantly improve operational efficiency and reduce costs for CIL subsidiaries.

Budget Breakdown

Equipment	■1,480,935
Manpower	■1,042,903
Consumables	■467,733
Travel	■146,186
Contingency	■166,107
Overheads	■396,463
TOTAL BUDGET	■3,700,327
