

Research Proposal: NACCER/2024/RD/8535

Optimization of Flotation Process for Waste Minimization

Principal Investigator:	Dr. Lakshmi Mehta
Institution:	IISc Bangalore
Research Area:	Mine Planning
Funding Source:	CIL
Duration:	18 months
Submission Date:	2024-01-21

Abstract

The proposed study focuses on developing a novel methodology to optimization of flotation process for waste minimization. The methodology involves by combining traditional methods with modern AI techniques for comprehensive analysis and implementation. The technology will enable sustainable mining practices and environmental compliance.

Budget Breakdown

Equipment	■1,434,757
Manpower	■1,214,431
Consumables	■344,982
Travel	■131,593
Contingency	■171,842
Overheads	■395,712
TOTAL BUDGET	■3,693,317
