

Advanced Research in Air Classification for Efficiency Improvement

Proposal ID: NACCER/2022/RD/1062 | Date: 2022-10-01

Funding Source: BCCL

Principal Investigator Details

Name: Prof. Manoj Mehta

Institution: IIT Bombay

Department/Area: Mine Safety

Duration: 12 Months

Project Abstract

The proposed study focuses on developing a novel methodology to development of advanced sensor-based sorting for ash reduction in indian coal. The methodology involves through integration of IoT technologies and data analytics for comprehensive analysis and implementation. The technology will enable sustainable mining practices and environmental compliance.

Keywords: Mine Safety; Advanced; Classification; Innovation

Proposed Budget Breakdown

Budget Head	Amount (INR)
Equipment	Rs. 1,131,406
Manpower	Rs. 1,047,421
Consumables	Rs. 293,953
Travel	Rs. 147,907
Contingency	Rs. 74,464
Overheads	Rs. 299,461
TOTAL OUTLAY	Rs. 2,994,612
