

Novel Crushing for Waste Minimization

Proposal ID: NACCER/2022/RD/1466 | Date: 2022-11-27

Funding Source: MCL

Principal Investigator Details

Name: Prof. Manoj MehtaInstitution: ISM Dhanbad

Department/Area: Coal BeneficiationDuration: 12 Months

Project Abstract

This research project aims to develop an innovative approach to development of advanced sensor-based sorting for ash reduction in indian coal. The methodology involves through integration of IoT technologies and data analytics for comprehensive analysis and implementation. The technology will enable sustainable mining practices and environmental compliance.

Keywords: Coal Beneficiation; Innovation; Method; Applied

Proposed Budget Breakdown

Budget Head	Amount (INR)
Equipment	Rs. 731,361
Manpower	Rs. 616,948
Consumables	Rs. 383,065
Travel	Rs. 150,820
Contingency	Rs. 57,542
Overheads	Rs. 215,526
TOTAL OUTLAY	Rs. 2,155,262
