

Development of Advanced Flotation for Quality Improvement

Proposal ID: NACCER/2022/RD/1800 | Date: 2022-05-03

Funding Source: MCL

Principal Investigator Details

Name: Prof. Anjali Sharma

Institution: CSIR-CMRI

Department/Area: Coal Beneficiation

Duration: 12 Months

Project Abstract

This research project aims to develop an innovative approach to development of advanced dense medium for grade enhancement in indian coal. The methodology involves utilizing machine learning algorithms and advanced sensors for comprehensive analysis and implementation. The technology will enable sustainable mining practices and environmental compliance.

Keywords: Coal Beneficiation; Efficiency; Separation; Novel

Proposed Budget Breakdown

Budget Head	Amount (INR)
Equipment	Rs. 1,057,722
Manpower	Rs. 486,353
Consumables	Rs. 326,349
Travel	Rs. 101,139
Contingency	Rs. 45,692
Overheads	Rs. 224,139
TOTAL OUTLAY	Rs. 2,241,394
